

HSNO Approved Filler training

- Status:** Approved Filler Test Certificate issued in accordance with the HSNO Act 1996 and the Hazardous Substances (Compressed Gases) Regulations 2004.
- Duration:** Approximately 3 hours, depending on group size.
- Frequency:** 5 years maximum. Periodic refresher training at shorter intervals by arrangement.
- Group size:** Minimum 1, maximum determined by size of suitable training venue.
- Outline:** A comprehensive training course for any person who fills or intends to fill compressed gas cylinders. The Hazardous Substances (Compressed Gases) Regulations 2004 requires that compressed gas cylinders may only be filled by Approved Fillers (with the exception of small resuscitation cylinders).
- The course is professionally presented in a clear-cut, multi-media format that includes training notes and a short test followed by a practical cylinder filling assessment.
- For those filling LPG cylinders we are also able to provide LPG Filler training and Site Trainer training using the LPG Association Training package.*
- Outcomes:**
- A fundamental understanding of the Hazardous Substances (Compressed Gases) Regulations 2004 pertaining to filling cylinders: cylinder design requirements, valves, periodic testing, marking requirements, filling pressure, weights, filler's responsibilities, etc.
 - 70% pass in written test;
 - A demonstrated competence in filling cylinders in the relevant gas traffic(s).
- Competencies:** Approved Fillers are able to fill gas cylinders in a competent, confident and safe manner at all times.
